EDUCATION

Texas State University San Marcos, TX
Bachelor of Science in Computer Science, Expected August 2028
• Coursework and project focus: software engineering, data structures, web development, AI-integrated systems, and computer architecture.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C++, Java, HTML, CSS
Frameworks/Tools: React, Next.js, Vite, Tailwind CSS, FastAPI, Streamlit, Node.js, Express, MongoDB, Git, GitHub, pytest
AI/Data: Google Gemini API, sentence embeddings, Sentence Transformers, scikit-learn, spaCy, cosine similarity, prompt design, reliability testing

PROJECTS

-
- AI-Powered Number Guessing Game | Python, Streamlit, Google Gemini API, pytest** Apr 2026
- Built an AI-integrated game where a human player competes against an adaptive AI opponent using difficulty-based strategies, confidence scoring, and feedback-driven guessing logic.
 - Designed a modular architecture separating Streamlit UI, session state, game validation, AI strategy, and external Gemini API calls to improve maintainability and testing.
 - Implemented 15+ pytest cases, logging, error handling, and fallback logic so gameplay continues reliably when API responses fail or return unexpected formats.
- AI Resume Analyzer | Python, FastAPI, Sentence Transformers, scikit-learn, spaCy** Jan 2026
- Developed a backend service that compares resume text against job descriptions using sentence embeddings and cosine similarity to generate semantic match scores.
 - Added skill extraction and missing-skill identification to help users understand gaps between their resume and target roles.
- LocalConnect | JavaScript, MERN Stack, HTML/CSS** Dec 2025
- Created a full-stack MERN application concept connecting travelers with local guides, using separate frontend and backend folders for a structured client-server design.
 - Practiced building maintainable web app architecture with reusable UI, API-based data flow, and database-backed application logic.
- Portfolio Website | React, Vite, Tailwind CSS, Framer Motion** Sep 2025
- Built a responsive personal portfolio with project, resume, contact, and about sections using component-based React development and Tailwind CSS styling.
 - Used Vite for fast development and Framer Motion for polished page transitions, hover effects, and interactive UI behavior.
- Membership QR Scanner for BSA TXST | TypeScript, Next.js** Dec 2025
- Contributed to a deployed membership QR scanner project for a student organization, gaining experience with TypeScript, Next.js app structure, and web deployment workflows.

EXPERIENCE

-
- Orientation Leader, New Student & Family Experiences | Texas State University** Summer 2025
- Led campus tours, check-ins, information sessions, and group discussions for incoming students and families while representing Texas State professionally.
 - Resolved student and family questions in fast-paced settings by communicating clearly, staying calm under pressure, and coordinating with supervisors when needed.
- Academic Athletic Center Tutor | Texas State University**
- Tutored student-athletes by explaining academic concepts, reviewing assignments, and helping students strengthen study habits and problem-solving skills.
 - Supported students with exam preparation, homework review, and concept mastery while adapting explanations to different learning styles.
- IT Facilities Student Worker | Texas State University**
- Assisted with basic technical support, equipment setup, troubleshooting, and daily technology needs for campus facilities and staff.
 - Helped organize devices, maintain workstations, communicate technical issues clearly, and support smooth technology operations in a professional office environment.
- Food Service / Utilities Worker | Jones Dining Hall**
- Supported daily dining operations through sanitation, restocking, dishroom support, register assistance, and food-service preparation in a high-volume team environment.

ACTIVITIES

-
- Active GitHub portfolio with 16 public repositories across Python, JavaScript, TypeScript, and C++ projects.
 - Interested in software engineering, AI-integrated applications, web development, and building clear, well-documented projects.
