Education

Texas State University

Bachelor of Science in Computer Science

San Marcos, TX

Expected Aug. 2028

- **Relevant Coursework:** Data Structures, Software Engineering, Web Development, AI-Integrated Systems, Computer Architecture

Experience

Nexus Games

Game Development Intern

Remote

Jun. 2026 – Present

- Implemented a server-authoritative multiplayer Mines mechanic using Colyseus, React Three Fiber, TypeScript, and Node.js.
- Designed player-specific mine synchronization so clients received only authorized gameplay data for hidden-information gameplay.
- Integrated real-time server-client events to synchronize mine placement, triggering, recovery, scoring penalties, and state updates.
- Built 3D mine rendering, color-based visibility rules, and solo/local multiplayer testing support while debugging synchronization issues.

PwC x Forage

Data Analytics Extern

Remote

2026

- Analyzed juvenile justice datasets using Python, pandas, and NumPy to evaluate data quality, relationships, and research feasibility.
- Performed exploratory data analysis by examining missing values, distributions, and response patterns to guide analytical decisions.
- Cleaned survey data, converted ordinal responses into numerical scores, and aggregated staff responses using pandas `groupby()`.
- Created descriptive statistics and visualizations with pandas and matplotlib to communicate trends and analytical limitations.

Texas State University

IT Facilities Student Worker

San Marcos, TX

- Supported campus technology operations by troubleshooting workstations, resolving hardware/software issues, and assisting staff.
- Configured equipment, organized technology inventory, and maintained reliable computing environments across university facilities.

Projects

AI Resume Analyzer | Python, FastAPI, Sentence Transformers, spaCy, scikit-learn

Jan. 2026

- Developed a backend service that calculates semantic resume-job similarity using sentence embeddings and cosine similarity.
- Applied NLP preprocessing with spaCy to extract skills and identify missing keywords from target job descriptions.

AI-Powered Number Guessing Game | Python, Streamlit, Google Gemini API, pytest

Apr. 2026

- Built an AI-powered web game that dynamically adjusted gameplay using Gemini API-generated guessing strategies.
- Improved reliability through error handling, logging, fallback logic, and 15+ automated pytest test cases.

LocalConnect | MongoDB, Express.js, React, Node.js

Dec. 2025

- Developed a full-stack MERN application connecting travelers with local guides through a client-server architecture.
- Built reusable React components, RESTful APIs, Express routes, and MongoDB data models for maintainable development.

Membership QR Scanner for BSA TXST | TypeScript, Next.js

Dec. 2025

- Contributed to a deployed QR-based membership verification application supporting student organization operations.

Leadership

Texas State University

Academic Athletic Center Tutor

San Marcos, TX

- Tutored student-athletes by explaining technical concepts, reviewing coursework, and adapting instruction to different learning styles.

Texas State University

Orientation Leader

San Marcos, TX

Summer 2025

- Guided incoming students and families through orientation activities, campus tours, and fast-paced information sessions.

Technical Skills

Languages: Python, JavaScript, TypeScript, Java, C++, HTML/CSS

Frameworks: React, Next.js, Node.js, Express.js, FastAPI, React Three Fiber, Three.js, Streamlit

Data/AI: pandas, NumPy, matplotlib, spaCy, scikit-learn, Sentence Transformers, Google Gemini API, NLP

Databases/Tools: MongoDB, Mongoose, Git, GitHub, Docker, npm, Postman, pytest, VS Code

Core: REST APIs, Multiplayer Networking, Server-Authoritative Architecture, Data Structures, Algorithms, OOP
